

Statement by TTA President, Geoffrey A. Fields

"We have to learn to live with Covid. It will be seasonal like the flu. If it were up to Dr. Fauci and China, the US would lockdown for the next 10 years and people would be forced to take 10 vaccine booster shots. The Communist Democrats and their partners in the 'Woke' Mainstream Media would love nothing more because it gives them the ability to power grab and cheat in future elections with mail-in ballots and voting machines.

As, Worldwide governments begin to mandate medical procedures to engage in society, it is imperative the Supreme Court rule this illegal. These mRNA Coronavirus vaccines are experimental in nature and have not been granted FDA approval and likely never will. We have medical freedom in this country and the Supreme Court has a chance to set precedent, not only for the United States, but the world.

Pending before the Supreme Court, is a case brought on by 8 brave students who are fighting back against forced vaccinations as a condition of enrollment. This WHO-backed CCP model of forced medical procedures and lockdowns have been adopted all across the country. SCOTUS can deliver a major victory for the people if they have the courage to do what's right in the "Indiana University Case". They must immediately rule that forced vaccinations, coronavirus lockdowns and restriction measures are against the constitution citing medical freedom. However, as of late the Supreme Court has done a great disservice to the American people by not ruling on the election. So don't get your hopes up, SCOTUS sided with communists once before so, they may do so again, The world is watching!"
