

Statement by TTA President, Geoffrey A. Fields

Now that cases are on the rise again, it's time to ask the question whether or not covid-19 vaccines are effective. Almost every major country in the world developed its own different vaccine. The entire world is taking different vaccines and even mixing and matching them. No matter how you slice it, the vaccine does not and cannot provide you with the same antibodies compared to if you recovered from Coronavirus.

Scientists say you cannot catch covid from the vaccine however, the nature of the beast says otherwise. The nature of mRNA studies have shown that a messenger programs your cells to elicit a certain reaction.

It is my belief that everyone who has been vaccinated has accidentally and unintentionally been spreading these new mutant variants. I believe the vaccines are fueling new variants due to the mRNA programming. Never in world history have we seen a 'natural' virus mutate so many times over. The fact that there are so many variants proves the lab leak theory and thus proves why the vaccine is not effective.

President Trump was correct in saying closing down the country was a big mistake. Had we left the world open and let the virus run its course, we would have achieved herd immunity by now and there wouldn't be all these new dangerous variants, the original virus would have died. Instead, unelected Scientists, Doctors, Medical experts and power tripping Governors ran the country into the ground in election year 2020 and are still doing so today.

The 2022 midterms are right around the corner. Now is a chance to vote every single Governor out of office who went along with WHO endorsed, CCP style, tyrannical lockdowns/economic socialism and forced mask and vaccination mandates on ourselves and our children.
