

Statement by TTA President, Geoffrey A. Fields

"WMU received an anonymous \$500M donation to go along with this vaccine mandate madness. WMU is punishing and fining students who miss their 'weekly covid tests', with maximum punishment of unable to register for classes. This is crazy. Straight out of the CCP playbook, These schools are led by super liberals who love these draconian-orwellian power grabs. You would think after losing 85M last year, They would do what is in the best interest of their students and faculty, not push divisive measures.. Schools like WMU that go along with these mandates are destroying our country!

With COVID lockdowns decimating our children's education, remote learning was not effective and did not offer the same quality of education as in-person learning does. While schools switched to remote learning, tuition stayed the same. These kids paid to have all the resources available to them, not stripped away. Issuing fines to young adults who are healthy is robbery. WMU has collected a total of \$60,000+ from these fines. Return immediately!"
