

STATEMENT BY TTA PRESIDENT GEOFFREY FIELDS

The indictment of former President Donald Trump is abhorrent and unacceptable. Political persecution cannot be tolerated in any society that claims to uphold the values of freedom, justice, and democracy. This blatant election interference undermines the rule of law and threatens the stability and well-being of our entire nation.

I unequivocally condemn the police state the Democrats have created and call on all Republicans to stand with President Trump and immediately endorse his campaign for the presidency in 2024.

Americans deserve answers! To what extent is the Biden White House involved in this attempt to influence the 2024 Presidential Election? All communications from the Manhattan DA and the federal government should be turned over immediately. The statute of limitations has expired, and Alvin Bragg, the US attorney in Manhattan, and the federal election committee all previously refused to bring charges.

This will have serious and far-reaching consequences for the country, both domestically and internationally. Today is a very sad day for America.
