

Statement by TTA President, Geoffrey A. Fields

MEMO TO GOP: The latest debates in New Jersey & Virginia were an awful outing for Republicans. The minute they received any pushback on issues like socialist lockdowns, mask and vaccine mandates, taxes etc.. they made a U turn. Republicans must be tougher and unapologetic for what they stand for. The Democrats went wild in 2020 with BLM riots, crime/death spiking in major cities, Draconian lockdowns, forced mask/vaccine mandates, the border crisis, Afghanistan, inflation and a killed economy etc... Democrats handed Republicans the midterms on a silver platter but Republicans, so far, are terrible debaters and the fake news media doesn't make things any easier.

Democrats are well versed in their talking points and fake empathy stories, Race baiting every chance they get. Making everything about race, furthering the divide of the American people. NJ Gov Murphy using "black and brown" people as token insrumensts as reasons to promote abortion is sickening.

Republicans must have a backbone when it comes to Pro-China Democrats. China aims to surpass the US by 2040. China is using Coronavirus lockdowns to harm the US economy and Democrats and Scientists going along with this CCP model of containment should be voted out.
