

MEDIA GASLIGHTS 2020 ELECTION DENIERS

By: Geoffrey Fields

- Donald Trump, Prominent figures and many elements of the public shouted the 2020 US election was not “free and fair”
- Concerns of election fraud surfaced from constitutional breaches and vulnerabilities affecting voting machines discovered after many audits
- Judges usurping State Legislatures in the name of COVID was one of many bases for lawsuits alleging these acts were unconstitutional
- Concerns of voter fraud led to the capitol riot on January 6th
- Democrats led by President Biden have called all Trump supporters “election deniers”, “domestic terrorists” and “threats to democracy”
- Media continues to ignore evidence and irregularities regarding 2020 election while promoting vulnerabilities ahead of 2022 midterms and 2024 Presidential Election

The 2020 election was anything but free and fair. In a piece from Time Magazine by Molly Ball, this is stated as fact, To the President, something felt amiss. “It was all very, very strange,” Trump said on Dec. 2. “Within days after the election, we witnessed an orchestrated effort to anoint the winner, even while many key states were still being counted.” In the piece titled “The Secret History of the Shadow Campaign That Saved the 2020 Election” they write “Trump was right – There was a conspiracy unfolding behind the scenes, one that both curtailed the protests and coordinated the resistance from CEOs. Both surprises were the result of an informal alliance between left-wing activists and business titans.. That’s why the participants want the secret history of the 2020 election told, even though it sounds like a paranoid fever dream—a well-funded cabal of powerful people, ranging across industries and ideologies, working together behind the scenes to influence perceptions, change rules and laws, steer media coverage and control the flow of information. They were not rigging the election; they were fortifying it.”

Like all globalists, they cannot help but brag about their master plan. A plan where they view themselves as the saviors, the arbiters of truth and narrative.

History as our reminder, anyone who questioned the months-long outcome of the 2020 election was deemed a threat to democracy. We have seen a former President's home raided and many top Trump Administration officials and supporters targeted by the intelligence community, federal government and mainstream media outlets hellbent on destroying anyone's life who dare point out irregularities regarding the 2020 Presidential election.

The confession from Time Magazine is just one aspect of the coordinated rigging of a Presidential election against Trump. The censorship of Hunter Biden's "Laptop From Hell" will go down in history as one of the biggest scandals ever. Now President, Joe Biden is proven to have lied to the American people on the debate stage regarding involvement of his son's business dealings, even going as far as having 51 members of the Intelligence Community sign a letter saying the laptop was russian disinformation. A complete sham, a coverup led by the highest levels of Government. More than 25% of Biden voters say they would not have voted for him had they known of his corrupt business deals dating back to his time as Vice President under Barack Obama. This alone would have changed the outcome of the election, an honest press.

State Legislature led audits have, proven election fraud at levels significant enough to overturn the 2020 election, uncovered the following: Fraudulent ballots have been discovered accepted and backdated after election day, ballot mules trafficked ballots into drop boxes amounting in the hundreds of thousands, voting machines and modems were vulnerable and connected to the internet, dead people voted, out of state people voted in the thousands, chain of custody documents and signature verification requirements were shredded. The Coronavirus pandemic allowed unsolicited mass mail-in-voting which led to unprecedented and mathematical irregularities and fraud. This is evidence being presented by President Trump, Mike Lindell and others who have been pushing to clean up our elections.

Fast forward to today - Politico prints "The greatest threat to Democracy you probably haven't heard of, Voting Machines"

NBC and Politico reporting has confirmed many of the "election deniers" claims. Reports confirm voting machines are "online and vulnerable" alongside the film "2000 mules" produced by Salem Media, prove hundreds of thousands of mail-in-ballots were trafficked. Despite new reporting the results of the 2020 election remain unchallenged by corporate media and the greater Washington establishment.

Bipartisan calls have roared to “get rid of the machines” to little avail. In 2016, Democrats falsely claimed election fraud with Trump and Russia and in 2020 the Republicans claimed election fraud. Two-cycles in a row both powerhouse political parties claimed fraud and have sowed distrust of our elections, whether in the right or in the wrong. Government creates the problem, doesn’t address it, then violently strikes down those who dare question them.

Surely 2024 will be free from claims of fraud? Think again.

"Right-wing extremists have a plan already in place to literally steal the next presidential election, and they're not making a secret of it," Hillary Clinton says in a video posted to Twitter by the progressive group Indivisible.

Clinton said: "The right-wing-controlled Supreme Court may be poised to rule on giving state legislatures the power to overturn presidential elections."

This comes after President Biden highlighted major “vulnerabilities to our election infrastructure” 2 weeks before the 2022 midterms.

Closing

The main takeaway should be stunning. It’s only okay when Democrats claim fraud. Their lives haven’t been destroyed, they aren’t called election deniers. In fact, the media protects them and “fortifies” elections in their favor. The Intelligence Community and the media protects and won’t report on Hunter Biden because “it’s sensitive” to Joe Biden. And now the Mainstream Media is reporting the voting machines will be hacked by Republicans, the same voting machines they’ve had to fight for limited access to for audits, the same voting machine companies that are suing Fox News, NewsMax and Mike Lindell.

NOW THAT IT’S THEIR IDEA, IT’S A GOOD IDEA

The Democrats have spent the past 2 years yelling “Don’t Matter” to anyone who presented evidence of election fraud in 2020 and 2022. They claimed voting machines weren’t online. Now, in a 180 flip - I fear Democrats are about to claim fraud after the 2024 election.

Democrats are the party of forced transgender ideology on children, lockdowns and war – not very popular. They know a “Judgment Day” is coming for their destructive, liberal, woke agenda. So they need a way to deflect from the royal

you know what, they are about to receive. Prepare for the biggest gaslighting campaign you have ever seen.

Evidence of fraud in 2020 from Trump sent to the January 6th Committee

- In Arizona, Maricopa County accepted at least 20,000 mail-in ballots after Election Day 2020, including 18,000 on November 4, 2020, picked up from the U.S. Postal Service—more than the entire Election margin of 10,457 ballots.

- In Georgia, 43,907 ballots from Facebook-funded drop boxes were counted in DeKalb County that violated the chain of custody rules. Remember, Georgia was decided by 11,779 votes.

Poll workers were caught scanning ballots multiple times on camera in Fulton County. Ballot images confirmed at least 3,390 duplicate votes were counted for Joe Biden.

At least 10,300 illegally cast votes in Georgia (and up to 35,000) are from individuals who voted in the wrong county, more than necessary to “tip the 2020 results.”

- In Michigan, Matt DePerno found voting machines were subverted and accessed remotely. In Antrim County, 7,048 votes were changed in favor of Joe Biden**
- In Pennsylvania, as of February 2021, there were 121,240 more votes than voters. By law, Pennsylvania cannot certify an Election with this type of discrepancy**
- In Wisconsin, nearly 200,000 voters identified as “indefinitely confined,” even though that was often not the case. They were simply using COVID as a means to skirt Voter ID laws for mail-in ballots. These ballots should have been thrown out. After the 2020 Presidential Election, a judge ruled the Democrat Governor did not have legal authority “to exempt all voters to get an absentee ballot without an ID.”**

- **44,272 people, according to the Wisconsin Legislative Audit Bureau, voted in November 2020, without ever showing Voter ID, which is more than twice the vote margin in the State.**
- **The Wisconsin Election Commission ordered nursing homes to violate Election laws, leading to widespread voter fraud and 95 to 100% turnout in nursing homes—an impossibility!**
- **In a powerful ruling by the Wisconsin Supreme Court, drop boxes that were used in the 2020 Election were found to be illegal. In a concurring opinion, justices stated, “If elections are conducted outside of the law, the people have not conferred their consent on the government. Such elections are unlawful and their results are illegitimate.”**
- **It was also recently reported that the FBI interfered in the 2020 Presidential Election by telling Facebook and the Media not to reveal anything about Hunter Biden’s laptop. The FBI said it was “Russian disinformation,” but knew that it wasn’t. It was a well-guarded secret that only one newspaper had the courage to report. Eight in 10 Americans believe this unprecedented collusion impacted the outcome of the 2020 Presidential Election.**
- **In addition, True the Vote, the Nation’s leading voters’ rights organization, collected over 4 million minutes of ballot drop box video, showing ballot stuffing at a level not seen before. This is also supported by highly accurate cell phone data that tracked the same individuals going to as many as 28 different locations in one day to do this. All in all, millions of ballots were stuffed. Based on their research, True the Vote estimates as many as 7% of all mail-in ballots cast could have been ineligible—approximately 4.8 million votes, an Election-changing number many times over.**
